

### Nondiscrimination on the Basis of Handicap/Disability

It is the policy of the Board of Education to take reasonable steps to accommodate our patrons and students with disabilities.

Each facility or part of a facility constructed by, on behalf of, or for the use of the district will be designed and constructed in such manners as to be readily accessible to and usable by persons with disabilities. Alterations of facilities that affect or could affect their usability will, to the maximum extent feasible, be done in such a manner that the altered portion is readily accessible to and usable by persons with disabilities.

This school district prohibits discrimination in any form against any person, persons, organizations or other entity. Employment opportunities will not be withheld from any qualified person solely because of a known disability. The school district will make reasonable accommodations to the known physical or mental limitations of a qualified person, unless it can be shown that the accommodation would impose an undue hardship on the operation of this school district. This school district does not require preemployment medical examinations except for bus drivers.

For the purposes of this policy, the term "reasonable accommodation" will mean making existing facilities used by employees readily accessible to and usable by individuals with disabilities, job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment, modifications of examination and training, the provision of qualified readers and other similar and reasonable accommodations.

Nondiscrimination on the Basis of Handicap/Disability - continued

In determining whether an accommodation would impose an undue hardship on the operation of the district, the district will consider:

- a. The nature and cost of the accommodation needed.
- b. The overall financial resources available to the district.
- c. The number and nature of employees at the facility in question.

In order to disseminate the content of this policy to all school district employees, the superintendent is directed to post appropriate notices in those common areas where employees may expect to find such notices.
