

Student Transportation

Transportation, when needed, will be provided for activities that have approval of the building principal and superintendent's office. Students traveling on school sponsored events will be required to ride on the transportation provided by the school district except when certain conflicts arise. Transportation other than school provided transportation must be worked out prior to the scheduled activity.

Students will return on school sponsored transportation except when certain conflicts arise. Students may be released to their parents or legal guardian at the activity only if their parent or legal guardian is present to request the son/daughter from the sponsor of the activity after the school event. If these conflicts are known prior to the activity, arrangements should be worked out with the sponsor and the building principal prior to that activity.
